

Student voice on learning

As part of our quality assurance process we have asked our students to comment on how they feel about their learning and progress in lessons. Please read on to see what some of them have to say.

Science

Branden Year 7

The teachers plan exciting activities.

The practical activities are amazing in science.

We have used different chemicals and we have learnt how to use Bunsen burners safely.

Alex Year 7

I like doing experiments because you never know what is going to happen.

We don't always have to write to learn.

Jayden Year 7

I have learnt some weird things in science in practicals!

Callum and Roderick Year 7

We learn a lot when we have practicals every Tuesday and sometimes on Thursdays.

We have more practicals than other schools because it explains the science better.

Philosophy and ethics

Luke Year 9

Philosophy and ethics is a good subject, I am quite strong in it. We learn about a lot of interesting subjects not just religion.

Our teacher is helpful when we don't understand. The lessons are quite fun, it is an alright lesson because we have good discussions about the work.

It is a good subject so far. We have done 2 tests and I have an A* in both so I am going to do well.

Joel Year 10

I think I am going to do well in history because Sir tests what we have learnt and I am doing well. Our lessons are interesting, especially learning how Hitler came to power. Sir explains things in lessons in detail which helps it all make sense.

History

Mathew Year 10

Sir **always** helps if we need help. He provides good and challenging work. The lessons are good because we always have something to do.

I enjoyed the WWI topic because it was interesting to learn. We have learnt about medicine and how it used to be compared to today! When we have tests we practice with sir so we are ready.

Freddie Doherty and Jonathan Willcox year 8

"The practicals are good and fun. It's fun to learn new stuff by actually doing it"

Science

Fenton Barford and Kieran Weedon Year 8

I like finding things out through practicals, like building a volcano looks cool and we get to see what the lava would actually do.
