

30 September 2020

Dear Parents

### Confirmed Case of COVID 19 – Single Case in School Community

We have been advised that there has been a confirmed case of COVID 19 within the school. It is important to inform you that this case is within our Year 12 cohort. Due to the organisation of the school Bubble system, where students arrive at staggered intervals, are taught in isolated areas and staff interaction between Bubbles is minimal, I am pleased to say that there is no risk to the wider school community.

We know that you may find this concerning but we are continuing to monitor the situation and are working closely with Public Health England. This letter is to inform you of the current situation and provide advice on how to support your child. Please be reassured that for most people, coronavirus (COVID 19) will be a mild illness.

The small number of Y12 Students who have been in close contact (within 2 metres) with the individual who has tested positive for coronavirus (COVID 19), have received a letter informing them that their child must stay at home for 14 days.

The school remains open and your child should continue to attend as normal if they remain well.

#### **What to do if your child develops symptoms of COVID 19**

If your child develops symptoms of COVID 19, they must not come to school and should remain at home for at least 10 days from the date when their symptoms appeared. Anyone with symptoms will be eligible for testing and this can be arranged via <https://www.nhs.uk/ask-for-a-coronavirus-test> or by calling 119.

People who do not have symptoms should not request a test unless this has been specifically requested by Public Health England or the local authority.

All other household members who remain well, must stay at home and not leave the house for 14 days. This includes anyone in your 'Support Bubble'.

Further information is available at: <https://www.gov.uk/government/publications/COVID-19-stay-at-home-guidance/stay-at-home-guidance-for-households-with-possible-coronavirus-COVID-19-infection>

The 14-day period starts from the day when the first person in the house became ill.

Household members should not go to work, school or public areas and exercise should be taken within the home. If you require help with buying groceries, other shopping or picking up

medication, or walking a dog, you should ask friends or family. Alternatively, you can order your shopping online and medication by phone or online.

Household members staying at home for 14 days will greatly reduce the overall amount of infection the household could pass on to others in the community.

If you are able, move any vulnerable individuals (such as the elderly and those with underlying health conditions) out of your home, to stay with friends or family for the duration of the home isolation period. Please see the link to the PHE 'Stay at Home' Guidance:

<https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance/stay-at-home-guidance-for-households-with-possible-coronavirus-covid-19-infection>

### **Symptoms of COVID 19**

The most common symptoms of coronavirus (COVID 19) are recent onset of:

- a new continuous cough
- a high temperature
- a loss of, or change in, your normal sense of taste or smell (anosmia)

### **For most people, coronavirus (COVID 19) will be a mild illness.**

If your child does develop symptoms, you can seek advice from the nhs.uk website at [https://www.nhs.uk/conditions/coronavirus-COVID\\_19/check-if-you-have-coronavirus-symptoms/](https://www.nhs.uk/conditions/coronavirus-COVID_19/check-if-you-have-coronavirus-symptoms/).

If you are concerned about your child's symptoms, or they are worsening you can seek advice from NHS 111 at <https://111.nhs.uk/> or by phoning 111.

### **How to stop COVID 19 spreading**

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID 19. **Do**

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards

### **Further Information**

Further information is available at [https://www.nhs.uk/conditions/coronavirus-COVID\\_19/](https://www.nhs.uk/conditions/coronavirus-COVID_19/)

Yours sincerely

Jane Partridge  
Headteacher
